Service Pack 1 for AIBO MIND 3 Software

Service Pack 1 is now available. This is an AIBO Custom Data to update the AIBO MIND 3 software with a new autonomous behavior, motion and sound tuning, and a few other fixes.
Please refer to the following details:

New behavior for photo taking

[How to use]
Give AIBO the voice command "Pose for me" or "Take a pose" when it is in autonomous mode or on the charging station and AIBO will pose for the camera for a few seconds.
There are 52 different poses with AIBO standing, sitting, laying, and on the station that can be shown randomly depending on AIBO's mode.
This will be helpful when you take a picture of AIBO!

Other new and tuned up features

- Additional AIBOne tricks
- Additional seasonal greetings for New Years and Christmas when you call "AIBO!" on that specific day.
- Tuning for voice recognition accuracy.
- Tuning for pink ball and AIBOne recognition accuracy.
- Tuning for improved motions and sounds.
- Tuning for motions which cause a high mechanical load.

Bug fixes

- This update fixes the problem when AIBO tries to boot up when the battery is hardly charged.
- This update fixes the problem with some of the sounds not playing from AIBO when the autonomous voice is set using the AIBO Custom Manager 3 application.
- The number of wireless LAN network channels has been corrected.

```
Note:
Once this Service Pack software is installed, it cannot be uninstalled.
